### HW/SW COMPATIBILITY and REQUIREMENTS

FLEETMATE is compatible with all versions of Windows from Windows 2000 forward, including Windows 10. FLEETMATE is not compatible with Windows 8 **RT**.

Although FLEETMATE will run on Windows 2000, Windows XP SP-3 is the recommended minimum operating system.

Each PC should have the following minimum recommended hardware and software features:

Standard Edition	Enterprise Edition
<ul style="list-style-type: none"><li>• 1.5 GHz CPU</li><li>• 2Gb of RAM</li><li>• 100 Mb Free Disk Space</li><li>• Laser or Ink Jet Printer</li><li>• 1024x768 Display Resolution</li><li>• Windows XP SP-3 (<i>or later</i>)</li></ul>	<ul style="list-style-type: none"><li>• 1.5 GHz CPU</li><li>• 2Gb of RAM</li><li>• 100 Mb Free Disk Space</li><li>• Laser or Ink Jet Printer</li><li>• 1024x768 Display Resolution</li><li>• Windows XP SP-3 (<i>or later</i>)</li><li>• SQL Server 2005 (<i>or later</i>)</li></ul>

If you plan to store your FLEETMATE Standard Edition database file on a network server, you will need a file server available. The server should offer at least 200Mb of free disk space to accommodate database growth over time.

If you want to use the built-in email features in FLEETMATE, you will need an active Internet connection. You will also need to know your SMTP Server Name, Port No, and account credentials in order to transmit email from within FLEETMATE.

If running FLEETMATE in a networked environment, each PC will need a 100mbps (or faster) hardwired network connection. If you need remote connectivity to run FLEETMATE from various remote offices, FLEETMATE is compatible with Windows Terminal Services.

If you wish to utilize the barcode features in FLEETMATE, you will need the following:

- Barcode scanner
- Barcode printer
- Barcode font.
