

Fleet Maintenance Software

⊕ **Powerful – Easy to Use - Affordable**

Used by Thousands Every Day

Whether you have 5 service vans, 50 busses, 500 patrol cars, or a mixed-fleet of 5000 vehicles and equipment, FLEETMATE will help you maintain your fleet effectively. It's full-featured maintenance management software that reminds you when preventive maintenance (PM) is due. And it keeps your service history and expense data organized and easy to access. All at a cost that makes sense. It's powerful, yet simple to use.

Reduce Maintenance Expenses

A well-maintained fleet asset is more reliable, lasts longer, and costs less to own and operate. That reduces your operating costs by minimizing unexpected breakdowns and costly repairs.

Try it FREE for 30-days!

It's often difficult to determine if a product will meet your business needs unless you can try it first. We understand, and that's precisely why we offer FLEETMATE as a free download. The unlicensed software is the actual commercial product, not a demo. And it will remain fully functional for 30-days. This way, you can determine first-hand whether FLEETMATE would be a good choice for you and your business. No sign-up required... just click and go.

Microsoft® SQL Server Support

FLEETMATE comes with a **Microsoft® JET** database built-in. There's nothing else to buy. But, if you already have a Microsoft® SQL Server license (2012 or later), you can choose to store your data in a SQL Server database. This way you can scale-up for maximum capacity and performance.

The Better Way to Manage Maintenance

All Pricing is in U.S. Dollars

Pricing subject to change without notice.

One-Time Fee

License	One-Time
Small Business	\$1299.95
Office License	\$2499.95
Site License	\$5999.95

Benefits

Maximize Asset Availability

When a fleet asset is out of service, the total cost to your company involves more than the cost of parts and labor. Keep your fleet well-maintained, in-service, and ready for business.

Ensure Safety & Regulatory Compliance

FLEETMATE gives you comprehensive fleet maintenance and service history in one convenient, easy to use system. No more searching through file cabinets and folders for service records.

Reduce Maintenance Costs

FLEETMATE helps you minimize costly breakdowns and repairs by reminding you when your fleet assets require service. With FLEETMATE, PM will be done... **On Time – Every Time.**

Extend Vehicle and Equipment Life

Proper, consistent preventive fleet maintenance helps you extend the useful life of your vehicles and other fleet equipment. This can also maximize salvage/resale value.

Improve Operational Efficiency

With FLEETMATE you can reduce your use of paper. This reduces the effort required to prepare, update, and retrieve physical documents. And it avoids misplaced information.

Fast 24/7 Access to Essential Fleet Data

Respond quickly to inquiries with timely, accurate fleet inspection records, maintenance history, and cost information. With FLEETMATE, vital fleet information is **at your fingertips.**

Major Features

- Built-In Microsoft® JET Database System
- Full Support for Microsoft® SQL Server 2012 or Later
- Profile-Based Multi-User Security and Access Control

Minimum PC Requirements

- ❖ A Windows® compatible PC with a CPU running @ 1.5GHz or faster
- ❖ Windows® 7, 8, 10 or 11, or Windows® Server 2012 R2 or later
- ❖ 4 Gb Random Access Memory (*more is better*)
- ❖ 1280 x 720 Video Resolution (4:3 or 16:9 aspect ratio)
- ❖ 500 Mb Free Disk Space
- ❖ An Inkjet or Laser Printer
- ❖ A 1 Gbps (*or faster*) Network Interface Card

Barcode Options

- ❖ Barcode Font, Printer, and Scanner (*if you want to scan/print barcodes*)
(*barcode fonts, printers, and scanners must be purchased separately*)

Networking, Cloud and Database Options

- ❖ In a Local Area Network environment, a 100 Mbps (*or faster*) hardwired network connection will be required. For wide-area networking, FLEETMATE is compatible with Windows® Remote Desktop Services. A Wi-Fi connection to your FLEETMATE Jet database file is not supported.
- ❖ For a cloud installation running FLEETMATE via RDP at the client, use Windows® Server 2012 R2 or later.
- ❖ FLEETMATE is compatible with Microsoft® SQL Server 2012 (*or later*) for data storage. Data migration software is included.
(*Microsoft SQL Server license must be purchased separately*)
